DETAILED ACTION

Allowable Subject Matter

1. Claim 1-3, 6-15 and 18-22 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a method of the selection and distribution unit's selecting the base transceiver station. The closest prior art, Huang et al. (US 6,590,879) teaches selecting the base transceiver station based on the signal strength. Huang, however, does not teach selecting the base transceiver station based on the all three parameters (signal strength, signal quality and predicted position) concurrently. These features are claimed in the independent claims and render them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
